

PROJECT MANAGER FOR THE DEVELOPMENT OF MECHATRONIC PRODUCTS; 80-100% (F/M/X)

The family-owned company Blum manufactures flap, hinge, pull-out, and pocket systems that are used in furniture all over the world. Did you know that we develop mechatronic products and take responsibility for them from the idea to the end of the product life cycle? Besides mechanics, the development of hardware together with software and firmware development represents the core of mechatronic product development.

YOU

- ... lead interdisciplinary development projects from conception to series launch
- ... are responsible for project execution in line with our company's Product Innovation Process
- ... coordinate with internal and external partners or committees regarding content, schedules, and costs
- ... are responsible with your team for the success of the project
- ... accompany your team as an important member to the jointly achieved project success

WE

- ... are looking for a team-oriented personality with a high level of commitment and communication skills
- ... place importance on good education – you have a completed technical education (University of Applied Sciences/Technical University) in the field of electronics, systems engineering, mechatronics, or a comparable discipline, ideally with experience in project management
- ... work together with the departments of "mechanical product systems," "Marketing," our manufacturing, as well as external suppliers and development partners
- ... offer you challenging and demanding tasks, for which you bring knowledge in project management and mechatronics
