SYSTEM ENGINEER FOR IDENTITY & ACCESS MANAGEMENT (F/M/X)

Did you know that our IT infrastructure with all its processes and applications is managed by around 350 IT specialists? And not just in Vorarlberg, but all over the world.

YOU WILL

- Work in a team to further develop our IT solutions in the field of identity and access management (IAM) and implement new requirements in One Identity Manager IAM

- Take care of the components of a centralised IAM, ensure that the system is reliable and be responsible for smooth operations

- Work together with experts to build interfaces with third-party systems – to this end, you will use programming and scripting languages (e.g. .NET, PowerShell) and interface technologies (e.g. Webservice, REST)

- Answer any questions related to implementation, carry our error analyses and take care of the integration of software manufacturers and service providers

WE

- Are looking for a team player with sound basic IT training (IT technical college, IT apprenticeship, or similar training) – ideally you already have experience in system support and/or system engineering

- Use third-party software in many areas – prior knowledge of user administration and authentication systems, e.g. Active Directory, Entra ID will help you get to grips with the new job

- Attach importance to your meticulous and conscientious approach to work – you handle confidential information responsibly as a matter of course
