

ENTERPRISE IT ARCHITECT (F/M/X)

Blum manufactures flap, hinge, drawer and pocket systems for furniture, which are delivered to over 120 markets. Did you know that our IT department has over 350 employees and has already reached the size of its own (large) company? Associated with this are various cross-sectional tasks for which we need your active support, following the motto: 'Run IT like a business.'

YOU

- ... take on the role of a pioneer in establishing and effectively implementing IT architecture management
- ... create understandable target images, reduce complexity, and provide an overview – thus supporting all IT processes
- ... skillfully utilize your toolkit of methods and bring together employees from different areas to collectively create a cohesive picture of our IT enterprise architecture

WE

- ... find ourselves in the midst of digital transformation – successful architecture work allows us to develop target images for tomorrow and beyond
- ... expect from you a deep understanding of IT architecture principles and methods
- ... value your excellent communication skills and your ability to convey complex matters
- ... have walked this path before – in your motivation letter, explain why we will succeed this time and how you plan to approach the challenge
