

PACKAGING TECHNICIAN AND MATERIALS SPECIALIST (F/M/X)

Blum is an innovative family business with an international market presence that develops high-tech furniture fittings for modern living environments. Did you know that we supply over 120 markets worldwide with our quality products? Our products travel all over the world in our packaging.

YOU

- ... independently manage packaging projects from the initial idea to the first test runs and market launch
- ... develop fibre-based transport packaging for our fittings that is used worldwide
- ... look after existing packaging solutions and develop them further in line with changing requirements
- ... are responsible for the packaging laboratory and ensure the quality standards of our fibre-based packaging materials
- ... coordinate the implementation of quality tests and work closely with our internal and external partners

WE

- ... value a good education - you have a relevant qualification in packaging technology and have already gained professional experience in this field
- ... rely on a structured way of working - ideally you already have experience as a project manager in classic and agile project management
- ... are looking for someone with fresh ideas and plenty of initiative so that we can continue to develop our strategy and mindset together in the long term
- ... value a confident, open and appreciative demeanour paired with a high level of initiative, solution orientation and enthusiasm
