

QUALITY ASSURANCE TECHNICIAN STAMPING (F/M/X)

The family-owned company Blum manufactures flap, hinge, pull-out systems, and pocket systems that are used in furniture all over the world. Did you know that as a quality assurance technician, we have a very broad knowledge of products and processes? This helps us to make good decisions together with our interface partners (development, production, maintenance, and marketing).

YOU

- support our manufacturing processes for series products in all quality-related matters
- accompany our systems and tool commissioning or new products from the development development phase through to series productio
- play an active role at the interface with colleagues in product development, production engineering, maintenance and production
- enjoy working with quality data and monitoring compliance with our quality management system

WE

- value a good education - you have completed a technical training in the field of mechanical engineering, HTL or technical college, machining technician, toolmaking technician
- are looking for an open and communicative personality who is looking for challenges and solves them together in a team
- expect to work independently and act on their own responsibility
- are looking for a team member who is willing to actively share knowledge with others and thus makes a valuable contribution to the continuous improvement of our products and of our products and processes
