

INDUSTRIAL ENGINEER (F/M/X)

Blum is an innovative family-owned business with an international market presence, developing high-tech furniture fittings for modern living environments. Did you know that at Blum we use over 1,500 operating resources across 35 technologies to manufacture our products with the highest precision in a highly automated process?

YOU

- ... design and optimize our processes in the areas of production and logistics
- ... generate performance data for planning, controlling, and calculating, and you identify and interpret key performance indicators in production control
- ... actively participate in the continuous improvement process in technical and organizational optimization projects
- ... support our team in designing our ergonomic workspaces and as an Industrial Engineer, you are also a specialist in the topics of workload and performance assessment

WE

- ... value a technical/commercial education (secondary vocational school, higher technical institute, university of applied sciences) or a technical apprenticeship with professional experience, ideally, you are familiar with the basics of business administration
- ... are looking for a team member who works independently, thinks analytically, and maintains good interpersonal skills within the team
- ... offer you challenging, diverse, and exciting tasks as an Industrial Engineer, which will advance you both professionally and personally
- ... work daily with MS Office tools – ideally, you are very familiar with them and have good IT skills
