

PROJECT ADMINISTRATOR INTRALOGISTICS (F/M/X)

Blum is a highly automated company. Did you know that the majority of internal goods transport is automated? Our colleagues are responsible for designing systems for the smooth handling of our internal logistics.

YOU

- ... **coordinate the further development and optimization** of our **logistical facilities**, such as automatic storage and transport systems
- ... are responsible for **planning new logistical facilities** and implementing projects at **international locations**
- ... collaborate with **internal and external partners** in the field of **intralogistics**, including the international context
- ... gradually evolve into an **independent project manager** after a well-guided training
- ... have an interest in **logistical facilities** (e.g., automatic high-bay warehouses, driverless transport systems, automatic transport systems)

WE

- ... value a good education – you have completed a technical HTL, FH, or TU degree in areas such as mechanical engineering, automation technology, mechatronics, or technical logistics
- ... offer exciting tasks in the field of **intralogistics** and seek someone who is interested in **logistical processes and facilities** within a production environment
- ... operate globally and require good **English language skills** (both written and spoken)
- ... are looking for a team member who values **independent and self-directed work**
